

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CONTRACT SCHOOLS.

It is provided in the appropriation act for the fiscal year ending June 30, 1899—

that the Secretary of the Interior may make contracts with contract schools, apportioning as near as may be the amount so contracted for among the schools of various denominations, for the education of Indian pupils during the fiscal year 1899, but shall only make such contracts at places where nonsectarian schools can not be provided for such Indian children to an amount not exceeding 30 per cent of the amount so used for the fiscal year 1895.

For the fiscal year 1895 there was used for contract schools of all denominations the sum of \$463,505, of which amount \$53,440 was appropriated for schools specifically named by Congress, which leaves a total of \$410,065 as the true amount from which the 30 per cent should be taken. The amount allowed for the two schools at the Osage Reservation (\$11,250), being paid out of Osage trust money, is not included in the amount set apart for contract schools, and, therefore, that sum has been deducted from the above total, which would leave a new total for 1895 of \$398,815, of which sum Congress evidently intended only 30 per cent to be used for 1899, thus making the sum of \$119,644.50 available for such purpose.

When the schedule for the fiscal year 1898 was prepared, there were two Protestant schools—the Bay Mills, Mich., \$600, and the John Roberts, Shoshone Agency, Wyo., \$2,160, a total of \$2,760. However, during the past year the school at Bay Mills, Mich., has been discontinued, and no contract was made therefor, leaving only one Protestant contract school in existence. In order to arrive at the amount to be set aside to the Catholic contract schools, \$2,760 was deducted from the total amount of \$119,644.50, leaving \$116,884.50 for distribution to the various Catholic schools.

Contracts for the fiscal year ending June 30, 1899, have been executed with the different schools for the number of pupils and at the rate and for the amount given in the schedule on the next page.

School tract contains 80 acres of land. This school was organized by the Norwegian Evangelical Church of America, July 4, 1886. In 1887 a contract was made with the Government for 27 scholars, which number was increased from year to year until it reached 140 children. In 1895 the contract system was abolished at this school and the whole plant was leased at a rental of \$1,800 per annum, and has since been operated as a Government Indian Boarding School.

The buildings marked with an asterisk were erected in 1870, and cost is unknown, but is supposed to be about \$10,000. It is impossible also to obtain the cost of all of the other buildings, except the boys' dormitory. The Fort Hall military post buildings and reservation were transferred by the War Department to the Interior Department April 26, 1883, for Indian school purposes, and in the following fall the school in operation at Fort

Hall Agency was removed thither. The reservation was proclaimed by Executive order of October 12, 1870, and contained 646.50 acres. One hundred acres of the school farm, under fences, are used for hay and grain, the balance being swampy, covered with willows, and of no value except as a cattle ranch.

There is no school farm; only a garden attached to the school. There are no data to show the original cost of the buildings. The plant, however, when transferred by the War Department to the Interior Department, was valued at \$700. The one new building was built of logs in 1895, at a cost of \$4,000. All of the buildings are in a very dilapidated condition. Plans are now pending for the erection of two dormitories, with accommodations for 100 pupils each. The buildings will probably be erected during 1899.
